

Objective

 Increase the understanding of Florida's Grades PreK-5 Literacy Instruction Practice Profile and evidence-based practices for improvement of literacy instruction.

PreK-5 Practice Profile: Desired Outcomes

- Increase the percentage of students ready to learn when entering kindergarten
- Increase the percentage of students reading on grade level by the end of third grade
- Close the achievement gap
- Rank #1 nationally in fourth grade reading on the National Assessment of Educational Progress

Sections of the PreK-5 Practice Profile

- Philosophy, Values and Guiding Principles
- Core Components:
 - Explicit Instruction
 - Systematic Instruction
 - Scaffolded Instruction
 - Corrective Feedback
 - Differentiated Instruction
- Glossary

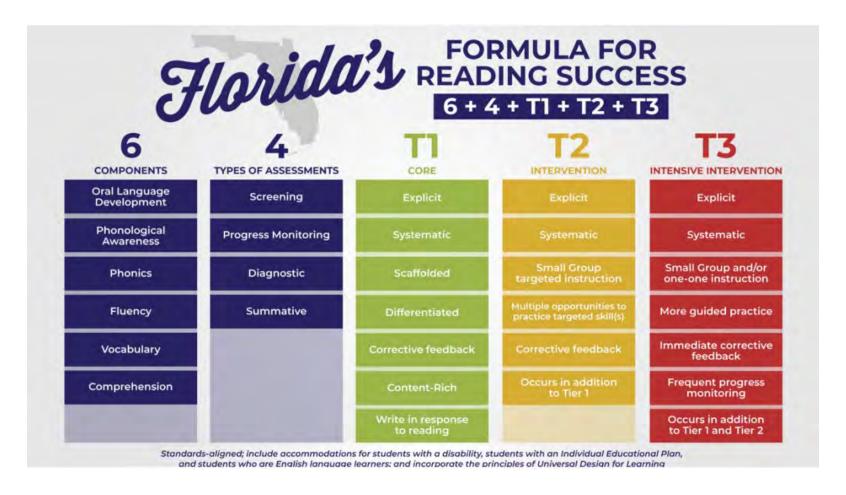

Philosophy, Values and Guiding Principles

Grades PreK-5 literacy instruction includes the continuum of literacy development from emergent literacy to early literacy and reading. The PreK-5 Practice Profile is based on:

- Section 1003.4201, Florida Statutes, which specifies the comprehensive system of reading instruction requirements for students enrolled in PreK through grade 12; and
- Rule 6A-6.053, Florida Administrative Code, defines reading instruction for grades K-12.

Philosophy, Values and Guiding Principles, Continued

Philosophy, Values and Guiding Principles, Continued

PreK-5 literacy instruction includes the continuum of literacy development from emergent literacy to early literacy and reading. The PreK-5 Practice Profile is aligned to:

- Florida Early Learning and Developmental Standards for Language and Literacy (FELDS); and
- Benchmarks for Excellent Student Thinking (B.E.S.T.)
 English Language Arts (ELA) Standards.

Assessment Terms Used in Reading

There are multiple terms used to describe reading assessments. This infographic is intended to clarify these terms.

Screening Assessment

"Brief assessments, typically administered to all students, designed to identify those at risk of failing an outcome. Performance on a screening assessment can be used to identify students who need further evaluation of skills as well as students who are expected to perform adequately or in an accelerated fashion on an outcome assessment."

A screening assessment can also be used as an interim assessment.

Diagnostic Assessment

An assessment that is typically given to those identified as at-risk on a screening assessment to provide specific information to practitioners about a student's strengths and weaknesses.¹

Progress Monitoring

There are two approaches to monitoring students' progress thoughout the school year.

Interim Assessment

An assessment that is used to evaluate student knowledge and skills relative to a specific set of academic goals. These assessments are typically administered within a limited time frame. Results can be used at the classroom level as well as aggregated and reported at the school or district level.²

Formative Assessment

An on-going assessment process that is used by teachers and students to gauge student learning of the current unit of instruction. Formative assessments help teachers provide corrective feedback, modify instruction to improve the students' understanding, or indicate areas needing further instruction.²

Summative Assessment

An assessment generally administered one time, usually at the end of a school year, to evaluate students' performance relative to a set of content

- 2. Perie, M., Marion, S., Gong, B., & Wertzel, J. (2007). The role of interim assessments in a comprehensive assessment system. The Aspen Institute.

Information in this infographic is supported by IES/NCEE's Regional Educational Laboratory Southeast at Florida State University (Contract ED-IES-17-C-0011) as resources and examples for the viewer's convenience. Their inclusion is not intended as an endorsement by the Regional Educational Laboratory Southeast or its funding source, the Institute of Education Sciences.

In addition, the instructional practices shown in this inflographic are not intended to mandate, direct, or control a State's, local educational agency's, or school's specific instructional content, academic achievement system and assessments, curriculum, or program of instruction. State and local programs may use any instructional content, achievement system and assessments, curriculum, or program of instruction they wish.

Ready, Set, Let's Go!

Core Component: Explicit Instruction

Core Component	Contribution to the Desired Outcomes	Accomplished Use
Explicit instruction is intentional teaching with a clear and direct presentation of new information to learners, which does not require student inferencing during the introduction of new or previously taught content, concepts or skills. One example is the gradual release model.	Explicit instruction contributes to the learner's clear understanding of newly introduced or retaught content, concepts and skills, positive engagement in relating to the new learning and strong early literacy progress.	 Introduces the new content, concept or skill clearly and directly. Models or demonstrates use of the new or retaught content, concept or skill. Provides clear visual and/or auditory examples (and non-examples when needed) to illustrate specific application of content, concept or skill. Provides learners frequent opportunities for guided and independent practice of new content, concept or skill.

Explicit Instruction: Ineffective Use

Ineffective Use

- Introduces new content, concept or skill indirectly, relying upon student inferencing; does not provide clear and concise explanation.
- Provides instruction without modeling or demonstrating new or retaught content, concepts or skills; does not clarify potential misconceptions.
- Provides instruction without visual and/or auditory examples and non-examples; does not illustrate specific application of new content, concepts or skills.
- Provides instruction without follow-up opportunity for learners to practice new content, concepts or skills; does not guide learners toward independence as soon as possible.

Core Component: Explicit Instruction

Scenario:

A fourth grade teacher is about to begin instruction with ELA.4.R.2.2 as the spotlight benchmark (Explain how relevant details support the central idea, implied or explicit.). Describe how the teacher could provide **explicit instruction**.

Core Component: Systematic Instruction

Core Component	Contribution to the Desired Outcomes	Accomplished Use
Systematic instruction is a planned sequence that includes a logical progression of content, concepts and skills, from simple to complex, with cumulative teaching/review and practice to enable learners to achieve learning goals.	instruction contributes to the learner's continuous acquisition of increasingly complex content, concepts and skills in order to become a confident reader. It decreases the prospect of a learner developing a reading difficulty over time.	 Uses a logical progression of content, concept and skill, proceeding from simple to more complex. Conducts a cumulative review, enabling learners to make connections to previously learned material. Provides opportunities for students to practice previously taught content, concepts and skills to progress toward learning goals.

Systematic Instruction: Ineffective Use

Ineffective Use

- 1. Teaches content, concepts or skills that do not proceed from simple to more complex.
- 2. Does not provide cumulative reviews for learners to build content, concepts and skills or make connections to new and previously learned material.
- 3. Does not provide opportunities for learners to practice new and previously taught content, concepts and skills in order to progress toward learning goals.

Core Component: Systematic Instruction

Scenario:

A first grade teacher is introducing a new spelling pattern focused on a vowel team to make the long ē vowel sound. Describe how the teacher could provide **systematic instruction** as the new spelling pattern is introduced.

Core Component: Scaffolded Instruction

Core Component	Contribution to the Desired Outcomes	Accomplished Use
Scaffolded instruction is the intentional support provided by a teacher for learners to carry out a task or solve a problem, to achieve a goal that they could not do without support. It is temporary support matched to the current understanding or skill level of learners. The intent is to provide a decreasing level of support until learners are empowered to perform independently.	Scaffolded instruction contributes toward the quality of a learner's efforts in relating to new or unfamiliar content, concepts and skills that fortify the development of language and literacy skills orally and in written form.	 Identifies learners who are having difficulty carrying out a task or solving a problem on their own. Provides intentional support matched to the learner's need, such as asking an open-ended question, providing prompts and cues, breaking down the problem into smaller steps, using visual aids, providing an example or offering encouragement. Monitors the learner's response to the scaffold and provides the next level of support needed on a scale from intense to moderate, gradually releasing ownership of learning to the student until they are able to perform the task independently.

Scaffolded Instruction: Ineffective Use

Ineffective Use

- 1. Overlooks learners having difficulty carrying out a task or solving a problem on their own.
- 2. Does not provide appropriate support that relates to the needs of the learner.
- 3. Does not monitor learner response to scaffolding; does not identify next level of requisite support for further learning; does not empower the learner to perform the task independently.

Core Component: Scaffolded Instruction

Participants with Last Names A-M:

What key words describe scaffolded instruction?

Participants with Last Names N-Z:

What is an example of a scaffold for students who are challenged by reading and comprehending grade-level text?

Core Component: Corrective Feedback

Core Component	Contribution to the Desired Outcomes	Accomplished Use
Corrective feedback is clearly communicated, timely and developmentally appropriate information aligned to learning goals or objectives that specifically addresses learners' errors or misconceptions. It is one type of ongoing instructional feedback.	Corrective feedback contributes to a learner's awareness of errors and increases self- correction and self- regulation, the quality of a learner's literacy engagement, motivation and independence for improved performance, behavior and academic achievement.	 Identifies learner's misunderstanding/error relative to the target instructional goal. Communicates immediate/timely feedback clearly using student-friendly language. Provides the learner the opportunity for timely self- correction. Repeats the process as needed or confirms accuracy based on learner response.

Corrective Feedback: Ineffective Use

Ineffective Use

- Overlooks learner's misunderstanding/error relative to the target instructional goal.
- 2. Provides no feedback to learner response.
- 3. Provides the learner no opportunity for self-correction.
- 4. Provides no confirmation or followup correction of the learner's accurate or inaccurate response.

Core Component: Corrective Feedback

Scenario:

A student makes an encoding error and writes "fn" for the word "fun." The teacher provides the following **corrective feedback**: "In your writing, make sure all of your words include at least one vowel."

How could the teacher provide **corrective feedback** as described in the Practice Profile?

Core Component: Differentiated Instruction

Core Component	Contribution to the Desired Outcomes	Accomplished Use
Differentiated instruction is adapting instruction in response to the distinct assessed skills and needs of individual learners in order to increase their access and opportunities to meet specific learning goals.	Differentiated instruction contributes to the refined understanding of specific content, concepts and skills within each learner's distinct range of understanding and independent practice that improves individual abilities to successfully engage in comprehension, fluency/decoding, letterword reading, vocabulary and writing.	 Delivers individualized instruction using one or more of the following adaptations to meet specific learning needs of each learner or group of learners: the content (what is taught), process (how learning is structured), product (what is produced and assessed) and/or the physical learning environment. Monitors the ongoing understandings and progress toward meeting specific learning goals to determine further adaptations.

Differentiated Instruction: Ineffective Use

Ineffective Use

- Delivers generalized instruction using none of the following adaptations: content, process, product or physical environment; does not address specific needs of individual learners or groups of learners.
- Does not monitor learner's ongoing understandings and progress toward meeting specific learning goals to determine further adaptations.

Core Component: Differentiated Instruction

Scenario:

A second grade class is reading Give Bees a Chance with a focus on the ELA.2.R.3.2 benchmark (Retell a text to enhance comprehension: Use the central idea and relevant details for an informational text.). Using data, how could the teacher differentiate instruction for students based on the content, process, product or physical environment?

Application

While watching the video, jot down notes on Handout 3 to answer the questions below.

- Which components of instruction did you observe in the lesson and how were they demonstrated by the teacher?
- How could the teacher integrate other components of instruction into the lesson?

Upcoming Webinar

Florida's Grades 6-12 Literacy Instruction Practice Profile

- When: April 10, 2025, 3:00-4:15 PM ET
- What: Develop an understanding of Florida's Grades
 6-12 Literacy Instruction Practice Profile
 - Clearly defines evidence-based instructional practices of core reading instruction
- Audience: district administrators, school administrators, literacy coaches and teachers
- Meeting Link: <u>https://us02web.zoom.us/meeting/register/Mkaz1IO</u>
 4TG-V1QjrSdA9qQ

Resources

All of the resources from the webinar will be posted on the Just Read, Florida! website.

EDUCATOR RESOURCES

- Literacy Institutes
- Literacy Coach Endorsement
- Webinars
- Literacy Micro-Credentials
- Evidence-Based Reading Interventions
- School Leader's Literacy Walkthrough
- Student Center Activities

Feedback

Your feedback is important to us. Please complete this brief survey!
