Student Performance and Program Accountability

2. The Provider possesses prior successful experience offering online courses to elementary, middle, or high school students as demonstrated by quantified student learning gains or student growth in each subject area and grade level provided for consideration as an instructional program option. For a provider without sufficient prior, successful experience offering online courses, the department may conditionally approve the provider to offer courses measured by the statewide assessment program pursuant to Section 1008.22, F.S. Conditional approval is valid for 1 year. Renewal of provider approval is contingent on sufficient performance data demonstrating success in accordance with Section 1003.499, F.S., and State Board of Education Rule.

Documentation to support Provider compliance:

Learning gains data for at least one complete school year from one of the following sources must be submitted for each course submitted for approval in this application:

1. *Statewide assessments, including End-of-Course (EOC) assessments. The data will be sufficient if):*
 - a. *The proportion of students earning an achievement level 3 or higher where the online course provider was the school of instruction at any point during the year as reflected in its Survey 5 data submission meets or exceeds the statewide proportion of students earning an achievement level 3 or higher; or*
 - b. *The subgroup of students enrolled in credit recovery or remediation*

courses earning an achievement level 3 or higher where the online course provider was the school of instruction at any point during the year as reflected in its Survey 5 data submission meets or exceeds the statewide proportion of subgroups of students enrolled in credit recovery or remediation courses earning an achievement level 3 or higher.

For course subjects not addressed by state assessments:

- 2. Nationally standardized summative achievement tests or nationally standardized interim assessments with multiple assessments to measure learning gains (nationally norm-referenced tests approved by the Department pursuant Rule 6A-6.0960, F.A.C.). The demonstrated gains will be sufficient if either the school's proficiency rate or gains rate among students where the online course provider was the school of instruction at any point during the year meet or exceed the national mean for the specific assessment for either the entire student population, or the subgroup of students enrolled in credit recovery or remediation courses, if provided.*
- 3. Proctored EOC assessments or semester examinations. Electronic proctoring with appropriately identified students is acceptable. Demonstrated gains will be sufficient if the pass rate on the proctored end-of-course examination among students where the online course provider was the school of instruction at any point during the year meets or exceeds 70%.*

Data shall include: the number of students enrolled, the number of students tested, the percentage of students tested, and performance results over the cohort period specified in the categories above. Student performance data are to be aggregated by course. The Provider may also submit data at a finer level of aggregation, such as by subgroups within each course. In addition, the Provider shall, upon the department's request, provide individual student performance data in the categories described above, as needed to determine if the Provider's student learning gains are sufficient to meet the requirements of Section 1003.499, F. S., and Rule 6A-6.0982, F.A.C. The period shall comprise the most recent data available. The data shall include all students in the course under review. Any definitions or materials needed to comprehend the assessment results must be provided.
