

Baccalaureate Enrollment and Graduation Expectations (Projections)

Florida College System and State University System

August 2018

Section 1001.02, Florida Statutes, *General powers of State Board of Education*, includes the following requirement.

(2) The State Board of Education has the following duties:

(v) To develop, in conjunction with the Board of Governors, and periodically review for adjustment, a coordinated 5-year plan for postsecondary enrollment, identifying enrollment and graduation expectations by baccalaureate degree program, and annually submit the plan to the Legislature as part of its legislative budget request.

In response to this requirement, the State Board of Education, in conjunction with the Board of Governors, submits the attached enrollment and graduation projections for baccalaureate degree programs in the Florida College and State University Systems.

The Florida College System institutions submitted projections and provided details about their projection methodologies, which may vary. The Florida Department of Education compiled the projections for inclusion in this plan. The projections included are for programs that have been approved by the State Board of Education.

The Florida Department of Education also consulted with the Office of the Board of Governors, resulting in the attached information for the State University System institutions.

SUS Baccalaureate Headcount Enrollment Trends and Estimates

This data is provided to the Florida College System staff in response to their request related to Section, 1001.02, Florida Statutes.

The actual data are undergraduate enrollment within the State University System by discipline (shown by six-digit CIP code). Estimates are based only on the five year average annual change, and not from any approved policy or strategic decision. The methodology used to estimate out-year projections are progressively conservative and designed to smooth volatile (defined as annual change of $\pm 10\%$ of the 2017-18 total) trends. If the average annual change is not within a $\pm 10\%$ range of the 2017-18 value, then the enrollment estimates are held constant at the 2017-18 level.

SUS Baccalaureate Headcount Enrollment Trends and Estimates

This data is provided to the Florida College System staff in response to their request related to Section, 1001.02, Florida Statutes.

The actual data are undergraduate enrollment within the State University System by discipline (shown by six-digit CIP code). Estimates are based only on the five year average annual change, and not from any approved policy or strategic decision. The methodology used to estimate out-year projections are progressively conservative and designed to smooth volatile (defined as annual change of ±10% of the 2017-18 total) trends. If the average annual change is not within a ±10% range of the 2017-18 value, then the enrollment estimates are held constant at the 2017-18 level.

SUS Baccalaureate Headcount Enrollment Trends and Estimates

This data is provided to the Florida College System staff in response to their request related to Section, 1001.02, Florida Statutes.

The actual data are undergraduate enrollment within the State University System by discipline (shown by six-digit CIP code). Estimates are based only on the five year average annual change, and not from any approved policy or strategic decision. The methodology used to estimate out-year projections are progressively conservative and designed to smooth volatile (defined as annual change of $\pm 10\%$ of the 2017-18 total) trends. If the average annual change is not within a $\pm 10\%$ range of the 2017-18 value, then the enrollment estimates are held constant at the 2017-18 level.

SUS Baccalaureate Degree Trends and Estimates

This data is provided to the Florida College System staff in response to their request related to Section, 1001.02, Florida Statutes.

The actual data are bachelor's degrees awarded within the State University System by discipline (shown by six-digit CIP code). The mathematical estimates are based only on the five year average annual change, and not any approved policy, strategic decision, or enrollment factors. The methodology used to estimate out-year projections are progressively conservative and designed to smooth volatile (defined as annual change of $\pm 10\%$ of the 2017-18 total) trends. If the average annual change is not within a $\pm 10\%$ range of the 2017-18 value, then the enrollment estimates are held constant at the 2017-18 level.

SUS Baccalaureate Degree Trends and Estimates

This data is provided to the Florida College System staff in response to their request related to Section, 1001.02, Florida Statutes.

The actual data are bachelor's degrees awarded within the State University System by discipline (shown by six-digit CIP code). The mathematical estimates are based only on the five year average annual change, and not any approved policy, strategic decision, or enrollment factors. The methodology used to estimate out-year projections are progressively conservative and designed to smooth volatile (defined as annual change of $\pm 10\%$ of the 2017-18 total) trends. If the average annual change is not within a $\pm 10\%$ range of the 2017-18 value, then the enrollment estimates are held constant at the 2017-18 level.

CIP2010	CIP LABEL	ACTUAL						AVG ANNUAL CHANGE (AAC)	CHANGE AS % OF 2017-18	ROUNDED MATHEMATICAL ESTIMATES				
		2012-13	2013-14	2014-15	2015-16	2016-17	2017-18			2018-19 100% AAC	2019-20 90% AAC	2020-21 80% AAC	2021-22 70% AAC	2022-23 60% AAC
