## Career and Professional Academy Enrollment and Performance Report, 2009-10

## At a Glance

In 2009-10, the third year of implementation of the Florida Career and Professional Education Act, school districts registered 838 academies, representing all 67 of Florida's school districts. This study found the following regarding enrollment patterns and student academic performance:

- Schools with at least one registered academy earned, on average, higher school grades than schools with no academies, reversing the skew toward lower performing schools found in 2007-08 and 2008-09.
- The most frequent career cluster represented by academies was arts, $\mathrm{A} / \mathrm{V}$ technology, and communication with 143 registered academies followed by health sciences with 128 academies.
- Academy students were most likely to be tenth-graders compared to the general high school population, which is over-represented by ninth-graders.
- Among the 102,430 students enrolled in career and professional academies, 8,629 or 8.4 percent, were reported as earning one or more approved industry certifications during the academic year.
- Academy students, particularly freshmen, had, on average, higher cumulative grade point averages than non-academy high school students.
- Academy students were less likely to be chronically absent, drop out, or be subjected to disciplinary actions than non-academy students.
- Academy students were more likely to take Advanced Placement or dual enrollment courses and academy graduates were more likely to be eligible for Bright Futures scholarships than their non-academy counterparts.
- The 2008-09 cohort of academy graduates was more likely to have enrolled in postsecondary education and be found employed in the fall of 2009.

## Introduction

According to section 1003.492(3), Florida Statutes (F.S.), the Florida Department of Education (DOE) shall conduct an annual analysis of student participation and performance in industry certified secondary career and technical programs authorized by the Career and Professional Education Act. Performance indicators for students enrolled in career and professional academies include, but are not limited to, graduation rates, retention rates, Florida Bright Futures Scholarship awards, additional educational attainment, employment records, earnings, industry certification, and employer satisfaction. The results of this study shall be submitted to the President of the Senate and the Speaker of the House of Representatives annually by December 31.

## Background

In 2007 the Florida Legislature passed the Career and Professional Education Act. The purpose of the Act was to provide a statewide planning partnership between the business and education
communities in order to attract, expand, and retain targeted, high-value industry and to sustain a strong, knowledge-based economy. The objectives of the Act are as follows:

- To improve middle and high school academic performance by providing rigorous and relevant curriculum opportunities;
- To provide rigorous and relevant career-themed courses that articulate to postsecondarylevel coursework and lead to industry certification;
- To support local and regional economic development;
- To respond to Florida's critical workforce needs; and
- To provide state residents with access to high-wage and high-demand careers.

To implement the legislation, the Act created statewide partnerships among the Department of Education, the Agency for Workforce Innovation (AWI), and Workforce Florida, Inc. (WFI). Section 1003.491(2), F.S., requires that each district school board develop a five-year strategic plan to address and meet local and regional workforce demands. This plan must be completed in collaboration with a district's local workforce board and local postsecondary institutions. A required element in this plan was the provision for at least one operational career and professional academy per school district, pursuant to s. 1003.492(2), F.S., by the beginning of the 2008-09 school year.

## Career and Professional Academies

A career and professional academy is a research-based program that integrates a rigorous academic curriculum with an industry-specific curriculum aligned directly to priority workforce needs established by regional workforce boards. According to section 1003.493(4), F. S., each career and professional academy must:

1) Provide a rigorous standards-based academic curriculum integrated with a career theme;
2) Include one or more partnerships with postsecondary institutions, businesses, industry, employers, economic development organizations, or other appropriate partners from the local community;
3) Provide shared, maximum use of private sector facilities and personnel;
4) Provide personalized student advisement;
5) Promote and provide opportunities for students to earn Bright Futures scholarships;
6) Provide instruction in high-growth, high-demand, and high-pay careers;
7) Deliver instruction relevant to the applicable career, including intensive reading and mathematics intervention;
8) Offer applied courses that combine academic content with technical skills;
9) Provide instruction resulting in competency, certification, or credentials in workplace skills;
10) Provide opportunities for students to obtain the Florida Ready to Work credential;
11) Include an evaluation plan;
12) Include a plan to sustain career and professional academies; and
13) Redirect appropriated career funding to career and professional academies.

Districts are required to annually register with the DOE career and professional academies that meet the requirements of s. 1003.493, F.S., during a reporting window of July 15 to September 15. Superintendents certify that each registered academy meets all of the requirements in statute. ${ }^{1}$

## Industry Certifications

A key component of this Act is a focus on industry certifications that are critical to Florida's employers. The legislation tasked the Agency for Workforce Innovation with defining "Industry Certification." The Agency's definition is the following:
" $A$ voluntary process, through which individuals are assessed by an independent, third-party certifying entity using predetermined standards for knowledge, skills and competencies, resulting in the award of a time-limited credential that is nationally recognized and applicable to an occupation that is included in the workforce system's targeted occupation list or determined to be an occupation that is critical, emerging or addresses a local need."

The Act required that DOE "develop and adopt rules for implementing an industry certification process" as an essential element of implementing the new law. The process described in Rule 6A-6.0573, Florida Administrative Code, has two stages. In the first stage, WFI produces an annually updated list of industry certifications that ensure skill proficiency, address emerging labor market and industry needs, and are based on the highest available national standards. This list is reviewed and approved by the WFI board and must be annually published according to the requirements of s. 1003.492(2), F.S. This list is known as the "Comprehensive Industry Certification List" and is published annually on March 1.

From this comprehensive list, the Department of Education develops the Industry Certification Funding List in the second stage of the process. This list is a subset of items on the Comprehensive Industry Certification List, based on the following criteria:

1) The certification must be achievable by students in a secondary-level program;
2) The certification must require a minimum of 150 hours of instruction; and
3) The certification must have been offered for at least one year in a school district. The Commissioner of Education may waive the one-year requirement when failure to do so would inhibit preparation of students for emerging workforce opportunities.

## Funding Incentives

For each student enrolled in a registered career and professional academy who earns a certification on the "Industry Certification Funding List" and graduates with a high school diploma, the district of instruction may earn 0.3 full-time equivalent (FTE) student membership for the following year's funding calculation in the Florida Education Finance Program (FEFP). ${ }^{2}$ Certifications earned through dual enrollment are not eligible for additional FTE. The additional FTE may not exceed 0.3 per student (i.e., no repeat allocations for additional certifications). In

[^0]2009-10, 1,237 students generated 371.1 additional FTE in the K-12 funding formula. Data reported for 2008-09 is used for the 2009-10 FEFP calculation.

## Accountability

An accountability mechanism included in the Act requires that 50 percent of students enrolled in each career and professional academy course who sat for industry certification exams or attempted college credit either passed a certification exam or earned college credit in the second year the course was offered. In the third year the threshold increases to 66 percent. In the subsequent year, districts may not offer or report industry certifications associated with courses that do not meet the thresholds.

## Scope

This analysis addresses the following questions:

1) How many career and professional academies are there and where are they located?
2) How many students are enrolled in career and professional academies and what are their characteristics?
3) How many and what type of industry certifications have career and professional academy students earned?
4) How did career and professional academy students perform academically compared to other high school students?
5) What were the postsecondary and employment placement outcomes for 2007-08 and 2008-09 career and professional academy graduates?

## Method

Data were extracted from the DOE Student Information System for academic year 2009-10 (Survey 5). ${ }^{3}$ These records were matched to the Florida Education and Training Placement Information Program (FETPIP) to identify Bright Futures eligibility. A file of 2007-08 and 2008-09 academy standard diploma earners was matched to FETPIP for placement in postsecondary education. Data on career and professional academy characteristics are from the DOE academy registration database. Data on schools housing academies was obtained from the Florida School Indicators Report.

## Findings

## Profile of Career and Professional Academies

In academic year 2009-10, 838 career and professional academies registered in Florida, and 806 ( 96.2 percent) of these academies reported student enrollments in 2009-10. All of Florida's 67 school districts registered at least one career and professional academy with DOE. The five

[^1]districts with the most registered academies were Miami-Dade (152 academies), Hillsborough (103), Palm Beach (65), Orange (51), Broward (40), and Sarasota (38). Table 1 shows the twoyear distribution trend of Florida's registered career and professional academies by school district and academy enrollments by district. Four districts with registered academies reported zero students for the 2009-10 academic year: Glades, Hamilton, Lafayette, and Madison. ${ }^{4}$ For a map of the geographic distribution of career and professional academy enrollments, see Appendix A.

## Characteristics of Schools that House Academies

In 2009-10, among high schools with at least one academy, 189 of 265 schools, or 71 percent, received an „A' or „B' grade in Florida's high school accountability system. Among high schools with no academies, 109 of 161, or 68 percent, received „A's or „B’s. High schools with academies are less likely to be housed in schools earning a "D" or "F" grade than high schools with no academies (see Exhibit 1). This represents a shift in academy school grade distribution compared to 2008-09, when academy schools were more likely to be graded "C" or below than non-academy schools. The early trend suggested that academies were initiated by districts as part of improvement strategies. As the program has matured and expanded, the location of academies has skewed more toward higher performing schools. Changes in overall grade distribution between 2008-09 and 2009-10 can be explained in part by changes in the grading formula instituted in the interim, but the relative differences between academy and non-academy schools within years should not be influenced by changes between years.

Exhibit 1
Grade Distribution Among Schools with Academies and Schools with No Academies

Source: DOE school grades data

When compared on other indicators, schools with at least one academy are similar to those with no academies. The average percentage of students who were economically disadvantaged ${ }^{6}$ among high schools with at least one academy was 45.8 percent compared to 41.8 percent among high schools with no academies. The percentage of chronically absent students was slightly higher in academy schools (13.7 percent) than the average non-academy public high school (11.3 percent). ${ }^{7}$ The percentage of students who were English language learners among academy schools ( 5.1 percent) was slightly higher than that of non-academy high schools ( 4.3 percent). ${ }^{8}$ For a listing of indicators for each school with at least one academy, see Appendix B.

## Academy Curriculum

The curricular foci of registered academies fall under specific career clusters. A career cluster is a broad group of related occupations based on commonalities in knowledge and skills required to perform job tasks. The most frequent career cluster represented by academies registered in 2009-10 was arts, A/V technology, and communication with 143 academies (see Table 2). The second most frequent cluster represented was health sciences with 128 registered academies.

Table 2
Number of Registered Career and Professional Academies by Career Cluster, 2009-10

| Primary Career Cluster | Number of <br> Academies |
| :--- | ---: |

[^3]In 2009-10, there were 102,430 students grade $9-12$ registered in career and professional academies, representing 12 percent of the entire high school population. ${ }^{9}$ Academy students were most likely to be tenth-graders compared to the general high school population, which has more ninth graders than any other grade level (see Table 3).

Table 3
Headcount by Grade Level of Career and Professional Academy and Non-Academy High School Students by Grade Level, 2009-10

| Grade <br> Level | Academy <br> Students | Percent | Non- <br> Academy <br> Students | Percent |

## Performance of Career and Professional Academy Students

This section will address the performance of career and professional academy students. The indicators addressed will include the following:

1) The number and percentage of academy students obtaining industry certifications;
2) Cumulative grade point average of academy and non-academy students;
3) Student engagement indicators of academy and non-academy students including chronic absenteeism, disciplinary actions, and dropout rates; and
4) Postsecondary readiness indicators including the percentage of academy and nonacademy participation in Advanced Placement and dual enrollment courses, and the percentage of graduating $12^{\text {th }}$ graders eligible for Bright Futures scholarships.

Performance levels on these indicators are reported at the aggregate state-level, summing up all academy and non-academy students statewide, grades 9-12. Performance levels for each registered academy can be found in Appendix C.

## Industry Certification

Among the 102,430 students enrolled in career and professional academies, 8,629 or 8.4 percent were reported as earning one or more approved industry certifications during the 2009-10 academic year. A total of 16,035 assessments were attempted by academy students, of which

[^4]9,564 were passed, resulting in a pass rate of 59.6 percent. The top three industry certifications earned by students in 2009-10 were Adobe Certified Associate (Photoshop), Adobe Certified Associate (Dreamweaver), and Certified Nursing Assistant (see Table 4).

Table 4
Industry Certifications Earned by Academy Students, 2009-10

| Industry Certification | Number of <br> Certifications <br> Earned | Percent |
| :---: | :---: | :---: |
| Adobe Certified Associate (Photoshop) | 3,640 | 38.1\% |
| Adobe Certified Associate (Dreamweaver) | 1,516 | 15.9\% |
| Certified Nursing Assistant (CNA) | 900 | 9.4\% |

| TOTAL CERTIFICATIONS BY CAPE ACADEMY STUDENTS | 9,564 | 100.0\% |

Source: DOE Student Information System

The higher the grade level of academy students, the greater the number of industry certifications earned. Forty percent of industry certifications earned by career and professional academy students were awarded to $12^{\text {th }}$ graders (see Table 5). Among ninth graders, 1,138 certifications were earned, representing 11.9 percent of total certifications reported. The progression in the number of certifications as grade level increases is expected given the time and training required to earn industry certifications.

Table 5
Industry Certifications Earned by Grade Level of Student, 2009-10

| Grade <br> Level | Certifications <br> Earned | Percent |
| :---: | :---: | :---: |
| 9 | 1,138 | $11.9 \%$ |
| 10 | 1,827 | $19.1 \%$ |
| 11 | 2,783 | $29.1 \%$ |
| 12 | 3,816 | $39.9 \%$ |
| Total | 9,564 | $100.0 \%$ |

Source: DOE Student Information System
Table 6 shows the distribution of earned student certifications by school district. Palm Beach reported the highest number of reported certifications with 1,921 , which represented 20.1 percent of all certifications reported in the state for career and professional academy students. Second highest was Lee with 1,057 certifications, or 11.1 percent, followed by Miami-Dade with 721, or 7.5 percent.

Source: DOE Student Information System

In addition to the 9,564 industry certifications earned by CAPE academy students, 6,761 industry certifications on the funding list were reported as earned by non-academy high school students in 2009-10 for a total of 16,325 certifications earned.

## Grade Point Average

Career and professional academy students in 2009-10 had an average cumulative GPA of 2.67 compared to 2.56 among the non-academy high school population. When average GPA is disaggregated by grade level (see Table 7), the difference declines from $9^{\text {th }}$ grade to $11^{\text {th }}$ grade, and among $12^{\text {th }}$ graders, non-academy students had the same average GPA. On average, academy students reported as earning an industry certification in 2009-10 maintained a higher cumulative grade point average (3.00) than academy students who did not earn a certification (2.60) and non-academy students (2.56).

Table 7
Average Cumulative Grade Point Average of Career and Professional Academy and NonAcademy High School Students by Grade Level, 2009-10

| Grade <br> Level | Academy <br> GPA | Non- <br> Academy <br> GPA |
| ---: | :---: | :---: |
| 9 | 2.57 | 2.42 |
| 10 | 2.63 | 2.48 |
| 11 | 2.68 | 2.60 |
| 12 | 2.78 | 2.78 |
| All <br> grades | 2.67 | 2.56 |

## Student Engagement

Career and professional academies were conceived as a way to offer a relevant curriculum to students. Student engagement can be measured through rates of absenteeism, disciplinary actions, graduation, and dropping out of school. Academy students were less likely to be chronically absent than non-academy high school students (see Table 8). ${ }^{10}$ Among academy students, 19 percent were chronically absent compared to 23.3 percent among non-academy students. Chronic absenteeism was more likely among non-academy students across all four grade levels, but, as was the case with GPA, the difference diminished the higher the grade level. The difference among $12^{\text {th }}$ graders is quite small ( 1.6 percentage points). Among academy students who earned an industry certification, 11.4 percent were chronically absent.

Table 8
Percentage of Career and Professional Academy and Non-Academy Students Chronically Absent by Grade Level, 2009-10

| Grade <br> Level | Academy <br> Chronically <br> Absent | Non-Academy <br> Chronically <br> Absent |
| ---: | :---: | :---: |
| 9 | $15.1 \%$ | $20.8 \%$ |
| 10 | $16.5 \%$ | $22.6 \%$ |
| 11 | $20.0 \%$ | $24.4 \%$ |
| 12 | $24.6 \%$ | $26.2 \%$ |
| All <br> Grades | $19.1 \%$ | $23.3 \%$ |

Source: DOE Student Information System

[^5]Academy students were less likely to have been reported as having disciplinary action taken against them than non-academy high school students (see Table 9). Among academy students, 20.0 percent had at least one disciplinary action on record compared to 21.3 percent among non-academy students. Examining the data by grade level reveals that $9^{\text {th }}-11^{\text {th }}$ grade academy students had a lower percentage of disciplined students than their non-academy peers, but the balance shifts in $12^{\text {th }}$ grade. Among seniors, a higher percentage of academy students were disciplined than their non-academy peers. Among academy students who earned an industry certification, 11 percent were reported with a disciplinary action compared to 20.8 percent among academy students who did not earn a certification.

Table 9
Percentage of Career and Professional Academy and Non-Academy Students with Reported Disciplinary Actions by Grade Level, 2009-10

| 11 | $19.5 \%$ |
| 12 | $18.1 \%$ |
| All <br> Grades | $20.0 \%$ |

Source: DOE Student Information System

Academy students were less likely to drop out than non-academy students, and academy seniors were more likely to graduate with a standard diploma than non-academy seniors. Among academy $12^{\text {th }}$ graders, 89.5 percent graduated with a standard diploma compared to 78.6 percent among non-academy $12^{\text {th }}$ graders. Among career and professional academy $12^{\text {th }}$ graders who earned an industry certification, 97.4 percent graduated with a standard diploma compared to 88.3 percent among academy students who did not earn a certification. The one-year dropout rate for academy students grades 9-12 (1.1 percent) was a percentage point lower than that of non-academy students (see Table 10).

Table 10
Percentage of Career and Professional Academy and Non-Academy Students Who Dropped Out by Grade Level, 2009-10

| Grade Level | Academy <br> Dropout Rate | Non-Academy <br> Dropout Rate |

## Postsecondary Readiness

Academy students were slightly more likely to be eligible for Bright Futures scholarships and have taken accelerated courses than non-academy students. An important goal of career and professional academies is to prepare students for postsecondary education by making them ready for the academic and technical work and giving them opportunities to earn postsecondary credit while in high school. One indicator of readiness for success in postsecondary education is eligibility for the Florida Bright Futures Scholarship. Among the academy seniors in 2009-10, 28.3 percent were eligible for one of the three levels of the Bright Futures scholarship. In comparison, 27.9 percent of non-academy seniors were eligible for the Bright Futures scholarship. Academy seniors earning certifications were much more likely to be Bright Futures scholarship eligible than their peers. Among academy seniors who earned at least one industry certification, 43.7 percent were eligible for Bright Futures compared to 25.9 percent among academy seniors who did not earn a certification.

Another indicator of postsecondary readiness is enrollment in accelerated courses (i.e., Advanced Placement, dual enrollment, International Baccalaureate, and Advanced International Certificate of Education courses). Among academy students 22.9 percent took one or more accelerated courses during the 2009-10 academic year. In comparison, the percentage for non-academy students was 22.2 percent. As was the case with Bright Futures scholarship eligibility, academy students earning certifications were much more likely to have taken accelerated courses than their peers. Among academy students who earned an industry certification, 32.9 percent took an
accelerated course compared to 22.0 percent among academy students who did not earn a certification.

Table 11 below summarizes the performance comparison between academy and non-academy students.

Table 11
Performance Comparisons Among Non-Academy, Academy, and Industry Certified Academy Students, 2009-10

| Performance Indicator | Non-CAPE | CAPE, No <br> Certification | CAPE + <br> Certification |
| :--- | :---: | :---: | :---: |
| Average GPA | 2.56 | 2.60 | 3.00 |
| Chronically Absent | $16.7 \%$ | $19.7 \%$ | $11.4 \%$ |
| At Least One Disciplinary Action | $21.3 \%$ | $20.8 \%$ | $11.0 \%$ |
| Dropout Rate | $2.2 \%$ | $1.2 \%$ | $0.2 \%$ |
| 12th Graders Earning Standard <br> Diploma | $78.6 \%$ | $88.3 \%$ | $97.4 \%$ |
| At Least One Accelerated Course | $22.2 \%$ | $22.0 \%$ | $32.9 \%$ |
| Bright Futures Eligible Seniors | $27.9 \%$ | $25.9 \%$ | $43.7 \%$ |

## Postsecondary Enrollment and Employment

The most recent cohort of career and professional academy graduates were just as likely to enroll in postsecondary education as non-academy high school graduates. Among the 200809 academy graduate cohort, 68 percent were found in postsecondary education the following fall, which was the same percentage of non-academy graduates entering postsecondary.
Academy graduates from 2007-08 tracked for an additional year after graduation were only slightly less likely to be enrolled in postsecondary education. Among the career and professional academy students in 2007-08 who earned a standard high school diploma, 61 percent enrolled in a postsecondary institution in the fall term of 2009 compared to 63 percent among non-academy graduates.

Career and professional academy graduates were more likely to be found employed than non-academy high school graduates. Among the 2008-09 academy graduate cohort, 46 percent were found employed compared to 43 percent among non-academy graduates. Academy
graduates from 2007-08 tracked for an additional year after graduation were also more likely to be found employed. Among the career and professional academy students in 2007-08 who earned a standard high school diploma, 56 percent were found employed compared to 51 percent among non-academy graduates.

## Two-Year Trends

The number of registered career and professional academies grew from 246 in 2007-08 to 838 in 2009-10 (see Table 12). The number of students enrolled grew by 416 percent from 19,868 students in 2007-08 to 102,430 in 2009-10. The percentage of Florida high school students enrolled in career and professional academies grew commensurately from 2.2 percent to 12.0 percent. The number of academy students earning industry certifications grew from 803 in 2007-08 to 8,629 in 2009-10. As the program has ramped up, the pass rate of academy students taking certification exams has dropped considerably from 85.7 percent in 2007-08 to $59.6 \%$ in 2009-10.

Table 12
Three-Year Trends in Career and Professional Academy Data

| Indicator | $2007-$ <br> 08 | $2008-$ <br> 09 | $2009-$ <br> 10 |
| :--- | :---: | :---: | :---: |
| Academies Registered | 246 | 490 | 838 |
| Students Enrolled | 19,868 | 53,324 | 102,430 |

## Conclusion

In the third year of implementation, the number of career and professional academies and enrolled students continued to grow dramatically across the state. Schools housing academies tended to earn higher school grades than non-academy schools. Academy students on average performed better than non-academy students on the following performance indicators: average GPA, chronic absenteeism, dropout rate, taking accelerated courses, Bright Futures eligibility, and initial placement in postsecondary education and employment after graduation from high school. In general, academy students who earned industry certifications performed better than both non-academy students and academy students who did not earn certifications.

The differences between academy and non-academy students might be explained by a number of school, student, and teacher characteristics. This study does not attempt to account for these variables. More sophisticated statistical analysis is required to isolate and predict the impact of career and professional academies on student achievement and outcomes.

[^0]:    ${ }^{1}$ 6A-6.0573 (7), Florida Administrative Code
    ${ }^{2}$ Section 1011.62(1)(p), Florida Statutes

[^1]:    ${ }^{3}$ Career and professional academy students were identified using the Career and Professional Academy Identifier data element (\#107775).

[^2]:    ${ }^{4}$ District staff were provided with enrollment reports during the year and at the end of the year. Districts may update their end-of-year data through February of 2011.
    ${ }^{5}$ Enrollment is unduplicated to the student and district. Students are counted more than once if they are reported in more than one district during the academic year.

[^3]:    ${ }^{6}$ Defined as students eligible for free or reduced price lunch. Data source: Florida School Indicators Report, 200809 data.
    ${ }^{7}$ Chronically absent is defined as 21 or more unexcused absences for the academic year. Data source: Florida School Indicators Report, 2008-09 data.
    ${ }^{8}$ Data source: Florida School Indicators Report, 2009-10 data.

[^4]:    ${ }^{9}$ Based on data set from the FLDOE Student Information System.
