Introduction

A Roadmap for Education in Florida

Education is a priority in Florida. Our state's students and families deserve an education system that creates a culture of high expectations for present and future generations. Our great state has spent more than a decade developing cutting-edge accountability systems and quality assessments, while collecting valuable education data that prove our students' incredible progress. In 2014-15, more than 45 states, including Florida, will move to national education standards and assessments that are built around the Common Core Standards. The Common Core will demand more from our students and they must be prepared to tackle the new material and tougher assessments that will measure how well they learn it.

Advancing high-quality education for the next generation of students is the primary responsibility of the Florida State Board of Education. This Strategic Plan offers a roadmap for Florida's education community that shows where we are, where we want to be, and how we will get there. The best interest of our children is at stake, and we must challenge them to reach higher and realize their full potential. Florida students must know that they can graduate from high school and be prepared to compete for jobs, join a global workforce, make their dreams a reality – and become the strong leaders that we know they can be.

Setting objectives that will ensure the best access and opportunities for our state's diverse student population, while increasing educator effectiveness, raising standards, and deepening the level of school curriculum, are at the forefront of Florida's ambitious education agenda. The State Board of Education is authorized in Section 1001.02(3)(a), Florida Statute, to "adopt a strategic plan that specifies goals and objectives for the state's public schools and Florida College System institutions." Florida's education system includes the Florida Public School System and The Florida College System. This Strategic Plan outlines a five-year vision to support students from prekindergarten through college so they may achieve success in their careers and life. How will we ensure this? Progress toward this vision will be measured through performance indicators included in this plan. The State Board of Education will review and approve the plan annually.

At a Glance Who We Are

In Florida, education is everything. We are fortunate to have a student-centered education system that is focused on expanding opportunities for learners at every level. Florida's parents also have the freedom to choose the educational path that is right for their child – one that focuses on preparing students for a successful future. Our state's innovative education system serves more than 3.5 million students, 4,200 public schools, 28 colleges, 188,000 educators, 47,000 college professors and administrators, and 318,000 full-time staff throughout the state. A national leader in school choice options, Florida is home to more than 570 charter schools, 480 magnet schools and programs, and 240 career academies. Our state operates more than 200 public virtual schools offering full- and part-time education programs to Florida's children; and, in 2011-12, more than 160,000 students participated in virtual education. The Florida Department of Education enhances the economic independence of Floridians through educational programs and services geared toward college, workforce education, job-specific skills, and career development. Florida ranks first in the nation for teacher quality, first in the nation in advanced placement participation, and first in the southern region for graduation rate and degrees awarded by The Florida College System.

Mission

Section 1008.31, Florida Statute, establishes the mission of Florida's education delivery system.

The mission of Florida's K-20 education system is to increase the proficiency of all students within one seamless, efficient system, by allowing them the opportunity to expand their knowledge and skills through learning opportunities and research valued by students, parents, and communities.

Vision

To achieve the mission established in statute for Florida's education delivery system, the State Board of Education presents the following vision statement.

Florida will have an efficient world-class education system that engages and prepares all students to be globally competitive for college and careers.

Strategic Goals

Section 1008.31, Florida Statute, establishes four goals for Florida's education system. Each of these goals will be measured through the accountability system and progress will be documented through the performance indicators included in this Strategic Plan.

- 1. Highest Student Achievement
- 2. Seamless Articulation and Maximum Access
- 3. Skilled Workforce and Economic Development
- 4. Quality Efficient Services

The first three goals will be supported by the priorities approved by the State Board of Education that are aligned with VPK students, K-12 students in the public school system, teachers and leaders, school choice, and postsecondary students in The Florida College System. The fourth goal, Quality Efficient Services, will support each priority and create an environment of high expectations. The priorities of the Florida Department of Education are shown in the following matrix.

Priorities Matrix

	Statutory Goals (1008.31)					
	Goal 1: Highest Student Achievement	Goal 2: Seamless Articulation/ Maximum Access	Goal 3: Skilled Workforce/ Economic Development			
Prekindergarten Students	Improve kindergarten readiness					
K-12 Students	 Increase the percentage of students performing at grade level Increase student participation and performance in accelerated course options 	 Increase high school graduation rates Improve college readiness Expand digital education 	 Expand STEM-related educational opportunities in high-demand areas Increase career and technical education opportunities Improve adult education programs in school districts 			
Teachers & Leaders	 Increase the percentage of effective and highly-effective principals Increase the percentage of effective and highly-effective teachers Reduce the number of out-offield teachers 	 Increase the percentage of effective and highly-effective teachers at high-minority, high- poverty and low-performing schools Reduce the number of out-of- field teachers at high-minority, high-poverty and low-performing schools 				
School Choice	 Increase the percentage of charter school students performing at grade level Improve charter school performance Ensure Supplemental Educational Service providers are high performing 	• Expand choice options for students				
Postsecondary Students	 Increase college readiness and success 	 Expand and maintain student access 	Prepare students for careers			
	Goal 4: Quality Efficient Services					

Strategies and Tactics

In order to organize the efforts to achieve the goals and priorities of the Strategic Plan, the Department will draft a supplemental "Strategies and Tactics Work Plan" document. The strategies and tactics will support and be aligned to the goals and priorities of this plan, while providing additional information regarding the specific activities and efforts involved.

Performance Indicators

The following performance indicators will show the progress toward attaining each of the four goals of Florida's education system. Each performance indicator has been categorized under one of the four goals and aligned to the most applicable priority. This plan will include the current year's data for each performance indicator starting with 2011-12. Upon approval of the performance indicators and current year data, goals will be established and approved for each indicator. The goals and performance indicators are not static and will continue to evolve as the Strategic Plan is refined.

5. Quality Efficient Services

The fourth goal of Florida's education system is quality efficient services. The three main goals and corresponding priorities of this plan are supported through efforts to achieve quality efficient services. Section 1008.31, Florida Statutes, specifies that these efforts will be measured by evidence of return on investment indicator for public school districts has historically been available, the methodology of this calculation is being revised to accommodate the transition to district grade points. When the revised return on investment indicator is finalized and approved by the State Board of Education, it will be added to this plan. In addition, plans are being developed to measure return on investment for all other education sectors.
