## Florida's Nonpublic Schools 2000-01

A nonpublic school is defined in Section 229.808, Florida Statutes, as “***an individual, association, copartnership, or corporation or a department, division or section of such an organization, which designates itself as an educational center which includes kindergarten or a higher grade...below college level....***” Throughout this report and its supporting legislation, the terms *nonpublic* and *private* are used interchangeably. Private elementary and secondary schools in Florida are not licensed, approved, accredited or regulated by the state but, they are required to make their existence known to the Department of Education and respond to an annual survey designed to make information about them available to the public. While survey respondents do identify the school and its program by type for directory information purposes, in this report no differentiations are made between religious, nonreligious, military, nonprofit or proprietary schools. All responses to the 2000-01 school year survey are included. Of the 1,860 known nonpublic schools, 214 are prekindergarten centers; 7 are other; 17 are specific exceptionality schools; 945 are elementary schools reporting student enrollment in one or more of the grades K-8; 125 are secondary schools reporting student enrollment only in one or more of the grades 9-12; and 552 are K-12 schools (elementary and secondary). Enrollment is reported by the survey respondents only as grade level totals, or as multigraded/ungraded totals, not by race or gender category.

Figure 1 shows the reported nonpublic school enrollment by grade for school years 1999-2000 and 2000-01.

**INSTRUCTIONAL AND ADMINISTRATIVE PERSONNEL TYPES**

**Total Nonpublic Instructional and Administrative Personnel Types: 34,664**

---

Figure 2 shows the reported numbers of nonpublic schools instructional and administrative personnel types. The Nonpublic School Data Base Survey collects information on seven personnel types: prekindergarten instructors, kindergarten instructors, elementary teachers (grades 1-6), secondary teachers (grades 7-12), librarians and media specialists, guidance personnel, and administrators. Information was not collected on support personnel such as secretaries, aides and paraprofessionals, and volunteers. Statistics for personnel in the named areas reflect actual numbers of such individuals but do not indicate the full range of functions they may perform. Reporting instructions requested that full-time employees who have responsibilities in more than one area be reported in the category where they spend the majority of their time. The survey does not differentiate between full-time and part-time personnel or the percentage of full-time employment represented by any part-time individual.

**Tables 1 through 6 are county by county displays of the data.** A county is not listed in the tables if there is no nonpublic school membership reported for that county.

**Table 1** is a summary of the seven types of instructional and administrative personnel in nonpublic schools.

**Tables 2 through 6** provide information on students in nonpublic schools in the following formats:

- **Table 2** shows reported nonpublic school enrollment for 2000-01 by grade.
- **Table 3** shows the aggregate number and percent of student enrollment by county in both public and nonpublic schools.
- **Table 4** shows the number of 2000 nonpublic high school graduates and the number who planned to pursue a postsecondary education grouped by the types of institutions in which they intended to enroll.
- **Table 5** shows the percentage of the total school-age population in public and nonpublic schools over the ten-year period from 1991-92 through 2000-01. During this period, the percentage of students enrolled in nonpublic schools increased from 9.31 to 12.65, and the annual PK-12 enrollment total increased by 60,488 students. Prekindergarten enrollments of 61,163 reported from registered daycare centers and nonpublic schools are included.
- **Table 6** counts nonpublic schools as they are listed in the 2000-01 Directory of Nonpublic Schools. Survey respondents designate their schools as Prekindergarten, Elementary K-8, Secondary 9-12, All Grades K-12, Special Needs ESE/Other by the grade level of the majority of their students. The 214 predominantly prekindergarten sites are shown on this table because they report enrollment and are listed in the Directory of Nonpublic Schools.
