Participation in Alternate Assessments Based on Alternate Academic Achievement Standards (AA-AAAS)

COMPLIANCE PROTOCOL

2022-2023

INTRODUCTION

Monitoring Priority: Effective General Supervision Part B/Free Appropriate Public Education (FAPE) in the Least Restrictive Environment

The purposes of Part B of the Individuals with Disabilities Education Act (IDEA) include, among other things, to ensure that all students with disabilities have available to them a FAPE that emphasizes special education and related services designed to meet their unique needs and prepare them for further education, employment and independent living. In addition, if a State has adopted AAAS for students with disabilities who are students with the most significant cognitive disabilities, as permitted in section 1111(b)(1)(E) of the Elementary and Secondary Education Act, the State (or, in the case of a districtwide assessment, a school district) must develop and implement alternate assessments and guidelines for the participation in alternate assessments of those students with disabilities who cannot participate in regular assessments, even with accommodations, as indicated in their respective individual education plans (IEPs).

In November 2020, the Florida Department of Education (FDOE) requested an extension of a waiver of section 1111(b)(2)(D)(i)(I) of the Every Student Succeeds Act requirement that a State may not assess using an AA-AAAS more than 1.0 percent of the total number of students in the state who are assessed in the subjects of reading/language arts, mathematics and science. On March 26, 2021, the U.S. Department of Education [granted](#) the FDOE's waiver request.

As part of this waiver, the FDOE assured that it would, among other things, implement, consistent with the plan submitted in the FDOE's waiver request, system improvements and monitor future administrations of the AA-AAAS to avoid exceeding the 1.0 percent cap. Finally, the FDOE was to provide a plan and timeline with clear, actionable steps and milestones that included, in relevant part:

- A clear description of how the State will improve the implementation of its guidelines for participation in the AA-AAAS, including by reviewing and, if necessary, revising its definition of students with the most significant cognitive disabilities (see Title 34, section 200.6(d)(1)) of the Code of Federal Regulations [C.F.R.], so that the State meets the 1.0 percent cap in each subject for which assessments are administered in future school years; and
- A clear description of how the State will monitor and regularly evaluate each local educational agency (LEA) to ensure that the LEA provides sufficient training such that school staff who participate as members of an IEP team or other placement team

understand and implement the guidelines established by the State for participation in an AA-AAAS so that all students are appropriately assessed.

Getting Started

As part of the self-assessment process, the Bureau of Exceptional Education and Student Services has selected a group of students who has been determined to meet, or continue to meet, eligibility criteria per Rule 6A-1.0943, Florida Administrative Code, F.A.C., for instruction in Florida's Access Points – Alternate Academic Achievement Standards (AP-AAAS) and participation in Florida's Statewide Alternate Assessment within the last calendar year. To complete the self-assessment process for each student, the school district will need to compile and review the following education records:

- Cumulative file, including but not limited to, attendance records, discipline records, grades, measurable annual goal reports, and statewide and districtwide assessment results
- IEPs
- Evaluation reports
- Parental consent forms
- Meeting notices and prior written notices
- Student class schedules

Upon completing the self-assessment process, please enter the results for each student in the [General Supervision Website](#) (GSW).

Additional Resources

The [National Center on Educational Outcomes \(NCEO\): Alternate Assessments: AA-AAAS](#)
The NCEO focuses on the inclusion of students with disabilities, English learners and English learners with disabilities in instruction and assessments. The scope of NCEO's work includes issues related to accessibility of assessments across the comprehensive assessment system including formative assessment practices, classroom-based assessments, diagnostic assessments, interim assessments and summative assessments.

The Access Project

The Access Project is funded by the State of Florida, FDOE, Bureau of Exceptional Student Education through federal assistance under the IDEA, Part B.

TIES Center

TIES Center is the national technical assistance center on inclusive practices and policies. It works with states, districts, and schools to support the movement of students with disabilities from less inclusive to more inclusive environments. Inclusion is an ongoing commitment to working for the valued membership, active participation, and learning of each student with their age-grade peers, utilizing a wide array of school community structures, practices, and supports.

Pre-Self-Assessment Probe

Instructions:

During the self-assessment process, school districts have the opportunity to correct school district-identified noncompliance prior to submitting the self-assessment results. In the event that a student's IEP has been reviewed and revised as part of a preemptive correction and is no longer eligible to participate in the AA-AAAS, please select "Option 2" and skip further probes.

Please note: the FDOE may request the complete education records of the student during the validation process.

	Response
Choose one of the following responses.	<p><input type="checkbox"/> Option 1. The student's current IEP indicates that the student must take an alternate assessment instead of a particular regular statewide or districtwide assessment of student achievement.</p>
	<p><input type="checkbox"/> Option 2. In accordance with 34 C.F.R. § 300.324 and Rule 6A-6.03028, Florida Administrative Code (F.A.C.), the school district reviewed the student's IEP and revised the IEP, as appropriate, to address whether the student was to participate in the FSAA. Based on that review, the IEP team determined that the student no longer met FDOE's AA-AAAS participation guidelines and the FDOE's definition of a "student with the most significant cognitive disabilities."</p>

Adherence to Florida’s AA-AAAS Participation Guidelines

Compliance Indicator: IEP teams in the state are adhering to the State’s AA-AAAS participation guidelines.
