

Identification of Critical Teacher Shortage Areas

Recommended Shortage Areas

This report identifies which certification areas are facing an unmet need of certified teachers using current data on teacher supply and demand. Using the information provided below, the recommended critical teacher shortage areas for the 2015-16 school year are as follows:

- English
- Exceptional Student Education
- Reading
- Foreign Language
- English for Speakers of Other Languages (ESOL)
- Science
- Mathematics

The shortage areas above represent certification types where substantial proportions of teachers are being hired to teach courses without the appropriate certification, where significant vacancies exist, or where postsecondary institutions do not produce enough graduates to meet the needs. This information can be used to determine the current and projected needs of classroom teachers for specific subject areas in the upcoming school year. The information used to determine these shortage areas is presented below.

Background

Section 1012.07, Florida Statutes, requires the State Board of Education to annually identify critical teacher shortage areas based on the recommendations of the Commissioner of Education. This list of shortage areas is used to identify high-need content areas and high-priority location areas using the following information:

1. The number and percentage of positions in each discipline filled by teachers not certified in the appropriate field;
2. The annual supply of graduates of state-approved Florida teacher education programs for each discipline;
3. The number and percentage of vacant positions in each teaching discipline; and
4. Critical teacher shortage areas which may be identified pursuant to rules adopted by district school boards. These areas shall be identified based on consideration of at least the information specified in items 1 through 3 above and submitted to the Department no later than June 1st of each year.

In the 2011 legislative session, Senate Bill 736, the Student Success Act was passed to reform employment, compensation, and evaluation practices for educational personnel and school administrators in Florida's public schools. As part of this legislation, section 1012.07, F.S. was amended to provide further clarity on determining and identifying critical teacher shortage areas. Additionally, section 1012.22, F.S. was amended to include critical teacher shortage areas for consideration by school districts when determining and adopting a salary schedule or salary schedules as the basis for paying all school employees hired before July 1, 2014.

Calculating Shortage Areas

The critical teacher shortage areas for 2015-16 were calculated using information provided in Exhibits 3 through 5 below. The Department ranked the information in each of the exhibits to create Exhibit 1.¹ Rankings were then averaged across all types of shortage data. This method provides the ability to compare different types of data that show many aspects of teacher supply and demand.

In Exhibit 1 below the bolded subject fields indicate the recommended 2015-16 Critical Teacher Shortage areas. The final column, “Final Rank” of Exhibit 1, shows that English is ranked as having the highest critical teacher shortage, followed by Exceptional Student Education, Reading, Foreign Languages, Science, English for Speakers of Other Languages, and Mathematics. The final rank column excludes Elementary Education and Social Science because further analyses showed a surplus of teachers in these fields (the amount of completers outnumber the projected vacancies). Technology Education, Business Education, Art, Educational Media Specialist, and Music are excluded from the final rank because they are not core academic subject areas.

Exhibit 1 – Summary of Critical Teacher Shortage Rankings for 2015-16.

Notes: Subject Fields that were missing data in one or more of the measures examined were excluded from the exhibit; Bolded subject fields indicate 2015-16 Critical Teacher Shortages.

*Science includes General Science, Science, Biology, Earth and Space Science, Chemistry, and Physics; Exceptional Student Education includes Exceptional Student Education, Speech Correction, Emotionally Handicapped, Hearing Impaired, Mentally Handicapped, Physically Impaired, Specific Learning Disabilities, Speech Language Impaired, Varying Exceptionalities, and Visually Impaired.

¹ The rankings order the data with one being the subject area that shows the most need for additional teachers. For example, when looking at Exhibit 5 the subject area with the fewest teachers produced would be ranked as number 1, but for Exhibit 4 the subject area with the most vacancies would be ranked as number 1.

Information on Shortage Areas

Data on teachers currently in the workforce and their certification fields are presented below to provide context for the recommended critical teacher shortage areas. This information covers the content areas in which the majority of teachers are currently certified, the content areas in which teachers are being hired, and the proportion of new hires that are not appropriately certified. Additional information is provided on projected teacher vacancies and recent completers of teacher education programs in Florida. The following exhibits provide information on teacher supply and demand:

- Exhibit 2 - Total Number of Teachers by Certification Area during 2013-14
- Exhibit 3 - Total Number of Newly Hired Teachers by Certification Area during 2013-14
- Exhibit 4 - Total Number of Current and Projected Vacancies by Certification Area for 2014-15
- Exhibit 5 - Number of Students Completing Teacher Education Programs during 2012-13
- Exhibit 6 - High Priority School Locations and Teachers Teaching In-field and Out-of-field

The top teacher certification area for the 2013-14 school year was by far Elementary Education, with 46.98% of teachers having this as their primary certification. Exhibit 2 provides the total number of teachers by their primary certification area for the top certification areas, as reported by school districts for the 2013-14 school year. Shortage areas for 2015-16 are bolded in the exhibit below. Following Elementary Education, the numbers drop off sharply with English making up 7.33% of certifications, English for Speakers of Other Languages (ESOL) at 5.84% and Mathematics making up 5.82% of certifications. As shown in Exhibit 2, the seven recommended critical teacher shortage areas are among the top content areas based on the number of teachers certified and account for about 30% of all certified teachers (n= 172,079).

In the 2013-14 school year, several of the certification areas that contained higher percentages of new hires not appropriately certified were also among the critical teacher shortage areas identified for 2015-16. Exhibit 3 provides the total number of new hires and the proportion of these new hires that were not appropriately certified, as reported by school districts for the 2013-14 school year. This information provides detail on the types of teachers that are currently in demand across all school districts and the proportions that are not appropriately certified when hired. Data on newly hired teachers highlight the teacher supply and demand issues districts face when attempting to fill positions with appropriately certified teachers. Districts prefer to hire appropriately certified teachers when possible. However, specialized subject area knowledge is critical for some content areas that results in a greater risk that children will not be taught the standards at the level or rigor required if the teacher they have is not certified.

Most of the recommended critical teacher shortage areas for 2015-16 are among those with the highest projected vacancies and the highest number of current vacancies for 2014-15 (all are within the top 13 vacancies). Exhibit 4 provides the total number of current vacancies for the 2014-15 school year and the total number of projected vacancies for the 2014-15 school year by certification area. This information is typically used to plan recruitment efforts, including The Great Florida Teach-In held annually in June. This highlights the anticipated subject areas of teacher demand seen across all school districts.

The number of students earning a certification in a particular content area in Florida gives an estimate of the number of new teachers available to fill vacancies in the state. Exhibit 5 presents the most recent information on new completers from teacher education programs across Florida.

Low performing and low-economic urban schools have a higher proportion of courses taught by teachers without the appropriate certification. Schools receiving a grade of “F” experience the largest proportion of out-of-field teachers. This information provides the context of high-need schools experiencing higher amounts of teachers not certified in the appropriate field for which they teach. The complete list of high priority school locations can be found in Appendix A and Appendix B attached.

In general, a larger percentage of teachers are teaching out-of-field in the high priority school locations compared to the statewide total of teachers teaching out-of-field. For example, 4.3% percent of teachers are teaching out-of-field across the state, 7.6% in F Schools and 5.6% in Urban/Low-Economic Schools. Rural/Low-Economic Schools (5.5%) and D Schools (7.3%) also have a higher percentage of teachers teaching out-of-field compared to the statewide total (4.3%). Exhibit 6 provides information on the number of high priority school locations and the proportion of courses at those locations being taught by in-field and out-of-field teachers. Consistent with Florida Statute we have identified high-priority locations as high-density, low-economic urban schools, low-density, low-economic rural schools, and schools that earn a grade of “F” or three consecutive grades of “D” or below. Low-economic schools are those that have 75 percent or more students who receive free or reduced lunch.

Statewide Totals- All Schools	3,211	194,733	186,395	95.7%	8,338	4.3%

¹The list of high priority school locations can be found in Appendix A and Appendix B attached.

²Per section 1012.07, F.S. in order to be a high priority location area, a school must have earned three consecutive “D” ratings. For the purposes of this analysis, we have also included schools that earned a “D” for the current year and either a “D” or an “F” for both of the prior two years, considering this situation to be functionally equivalent with the intent of the statute.
