Element Name: Vaccine Status, Date																			
Definition/Domain																			
<p>Vaccine Status, Date is a ten-character field which presents information about each of the vaccines required for children. For most cases, the first character tells the vaccine type, the second denotes the dose in the series and the remaining eight characters represent the date the dose in a series was administered.</p> <p>There are also two special cases which will indicate that dates are not required for some individuals because:</p> <ol style="list-style-type: none"> 1) they have a medical or religious exemption, or 2) they entered school prior to the time when individual vaccination dates were required - these students have been immunized. <p>Special cases:</p> <table border="0"> <thead> <tr> <th align="left"><u>Ten Character Code</u></th> <th align="left"><u>Meaning</u></th> </tr> </thead> <tbody> <tr> <td>8099999999</td> <td>The student has been immunized, but dates are not available for the individual doses.
