## Home Education in Florida

Established by the Florida Legislature as a school choice option in 1985, home education is defined in Section 1002.01, Florida Statutes (F.S.), as “the sequentially progressive instruction of a student directed by his or her parent.” Section 1002.41, F.S., requires parents to notify the district school superintendent in the county of residence of their intent to establish and maintain a home education program and to provide the name, address, and birth date of each participating student.

Florida law does not require a particular educational background for parents of home-educated students. Parents who home educate their children are able to customize the curriculum to the needs of each child. However, a portfolio of activities, records and materials showing student work must be maintained for two years and made available to the school district if requested in writing. Additionally, Section 1002.41, F.S. requires that students in home education programs annually undergo one of five academic evaluation options, the results of which must be submitted to the school district by the parent.

Each year, the Department of Education surveys all school districts to collect data on the number of students and families who have registered their intent to establish home education programs. For the 2023-24 school year, the numbers provided by the districts indicate that 114,239 families and 155,532 students participated in home education programs. In the last five years, the total number of students in home education has increased by 49,417 or 46.6% over the 106,115 students reported in 2019-20, with a five-year average of 142,295 students.

For more information on home education in Florida, please visit the Web site of the Office of Independent Education and Parental Choice at:
