

Identification of Critical Teacher Shortage Areas for 2022-23

Recommended Critical Teacher Shortage Areas

This report identifies which certification areas represent the greatest need among teachers statewide. Using the information provided below, the recommended critical teacher shortage areas for the 2022-23 school year are as follows:

- English
- Exceptional Student Education (ESE)
- Science-General
- Reading
- English for Speakers of Other Languages (ESOL)
- Math
- Science-Physical

The shortage areas above represent certification areas where substantial proportions of teachers who are not certified in the appropriate field are being hired to teach such courses, where significant vacancies exist and where postsecondary institutions do not produce enough graduates to meet the needs of Florida's K-12 student population. This information can be used to determine the current and projected needs of classroom teachers for specific subject areas in the upcoming school year. The process used to determine these critical teacher shortage areas is presented below.

Background

Section (s.) 1012.07, Florida Statutes (F.S.), requires the State Board of Education (SBE) to annually identify critical teacher shortage areas based on the recommendations of the Commissioner of Education. This statute is accompanied by SBE Rule 6A-20.0131, Florida Administrative Code, which specifies that the list of shortage areas identify high-need content areas and high-priority location areas using the following information:

1. The number and percentage of positions in each discipline filled by teachers not certified in the appropriate field;
2. The annual supply of graduates of state-approved Florida teacher education programs for each discipline;
3. The number and percentage of vacant positions in each teaching discipline; and
4. Critical teacher shortage areas which may be identified pursuant to rules adopted by district school boards. These areas shall be identified based on consideration of at least the information specified in items one through three above and submitted to the Department of Education no later than June 1st of each year.

Additionally, ss. 1012.22(1)(c)4.b. and 1012.22(1)(c)5.c.(III), F.S., include provisions requiring local school districts to incorporate critical teacher shortage areas into both their grandfathered and performance salary schedules.

Determining Shortage Areas

The critical teacher shortage areas for 2022-23 were determined using information provided in Exhibits 3 through 5. The department used the information in each of the exhibits to create rankings for each measure in Exhibit 1.¹ Rankings were then averaged across all measures to produce the final rankings.

¹ The rankings order the data with 1 being the subject area that shows the most need for additional teachers. In the case of a tie, all subject areas in the tie are assigned the rank indicating a higher need for additional teachers. For example, if three subject areas tie for third place (i.e., there is no way to distinguish between third, fourth and fifth place), they would all be assigned third place.

In Exhibit 1 below, the shaded and bolded subject fields indicate the recommended 2022-23 Critical Teacher Shortage Areas. The final column in Exhibit 1, “Final Rank,” shows that English was in first place with an average rank of 4.67. ESE was ranked second, followed by Science-General, Reading, ESOL, Math and Science-Physical as critical teacher shortage areas.

* Science-General includes Science and General Science; Science-Physical includes Chemistry and Physics; ESE includes Exceptional Student Education, Speech Correction, Emotionally Handicapped, Hearing Impaired, Mentally Handicapped, Physically Impaired, Specific Learning Disabilities, Speech-Language Impaired, Varying Exceptionalities, Visually Impaired, Autism Spectrum Disorders endorsement, Adaptive Physical Education and Orientation and Mobility endorsement; and Reading and ESOL include both the certification and the endorsement.

Information on Critical Teacher Shortage Areas

Data on teachers currently in the workforce and their areas of certification are presented below to provide context for the recommended critical teacher shortage areas. This information covers the following: certification areas in which the majority of teachers are currently certified; the number of courses taught by teachers who were not appropriately certified for the courses they were teaching; the projected number of teacher vacancies as reported by school districts; and the number of recent completers of state-approved teacher preparation programs in Florida. Additional information is provided on the number of courses being taught by teachers who were not certified in the appropriate field for the courses they were teaching in high-priority locations.² The following exhibits provide information on teacher supply and demand:

- Exhibit 2 – Number of Teacher Certifications Held by Certification Area – Top Areas for 2020-21 School Year
- Exhibit 3 – Number of Courses Taught by Teachers Not Certified in the Appropriate Field by Certification Area During 2020-21
- Exhibit 4 – Number of Current and Projected Vacancies by Certification Area for 2021-22
- Exhibit 5 – Number of Students Completing Teacher Education Programs During 2019-20
- Exhibit 6 – High-Priority School Locations and Courses Taught by Appropriately Certified Teachers Among Schools That Would Have Traditionally Received a School Grade

It is important to note and emphasize that all data are as reported by school districts or teacher preparation programs.

When reviewing Exhibit 6, it is important to note, pursuant to Florida Department of Education (FDOE) Emergency Order No. 2021-EO-02, only schools for which an approved opt-in request was submitted by the school district superintendent or charter school governing board have a letter grade assigned for the 2020-21 school year. Of the 3,080 eligible schools, 631 (20%) applied to opt-in and were approved to receive a school grade. Further, none of the 631 schools that received a grade in 2020-21 were assigned a “D” or an “F” grade. Because of this, school grades information is excluded from Exhibit 6 this year. More information can be found at <https://www.fldoe.org/core/fileparse.php/19861/urlt/2021-EO-02.pdf>.

² Section 1012.07, F.S., defines high-priority locations as high-density, low-economic urban schools; low-density, low-economic urban schools; low-density, low-economic rural schools; and schools that earned a grade of “F” or three consecutive grades of “D” or below pursuant to s. 1008.34, F.S.

Exhibit 2 provides the total number of certifications held by teachers in 2020-21 by certification area. If a teacher held a certification in multiple subject areas, the certification is counted once for each subject area. The most common teacher certification area for the 2020-21 school year was Elementary Education, making up 20.78% of all certifications. This was closely followed by ESOL at 19.62%. Shortage areas for 2022-23 are shaded and bolded in the exhibit below. Following Elementary Education and ESOL, the numbers drop off with ESE making up 10.21% of certifications and Reading making up 7.87% of certifications. The six recommended critical teacher shortage areas account for about 43.92% of all certifications (n=185,235). The complete crosswalk of “Certification Subject Codes to Certification Areas” can be found in Appendix B.

Districts prefer to hire teachers certified in the appropriate field(s) for the courses they teach when possible to ensure students receive instruction at the level of rigor measured by statewide, standardized assessments. Exhibit 3 provides the total number and percentage of courses taught in each certification area statewide, as well as the total number and percentage of courses taught in each certification area by teachers who were not certified in the appropriate field, as reported by school districts for fall of the 2020-21 school year. The difference is calculated between the percentage of total courses reported and the percentage of total courses taught out-of-field. A large and negative difference indicates that the certification area represents a larger share of the courses taught by out-of-field teachers than it does of the overall courses offered. Students taking courses requiring certification in these areas are more likely to receive instruction from an out-of-field teacher. Certification areas are ranked in Exhibit 3 based on this difference indicating a proportionally greater need for in-field teachers.

This information provides detail on the certification areas that are currently in demand across all school districts based on how frequently courses are being taught by teachers without the required certification relative to those courses' prevalence among course offerings in Florida. ESE had the highest percentage of courses taught by teachers without the required certification relative to its prevalence among course offerings in Florida.

Most of the recommended critical teacher shortage areas for 2022-23 are among those with the highest projected vacancies and the highest number of current vacancies for 2021-22. Exhibit 4 provides the total number of current vacancies for the 2021-22 school year and the total number of projected vacancies by certification area. This information is collected from each district and is typically used to plan recruitment efforts, including “The Great Florida Teach-In” held annually. This highlights the anticipated subject areas of teacher demand seen across all school districts.

The number of post-secondary students earning a certification in a particular content area in Florida gives an estimate of the number of new teachers available to fill vacancies in the state. Consistent with s. 1012.07, F.S., high-priority locations are identified as high-density, low-economic urban schools; low-density, low-economic rural schools; and schools that earned a 2018-19 school grade of “F” or three consecutive grades of “D” or below, pursuant to s. 1008.34, F.S.³ Low-economic schools are those that have 75 percent or more students who qualify for free or reduced-price lunch. Urban and rural school distinctions are based on the 2019-20 National Center for Education Statistics (NCES) locale codes which are a measure of geographic status on an urban continuum that ranges from “large city” to “rural” based on the standards used by the Census. The list of high-priority school locations can be found in Appendix A.

Exhibit 6 provides information on the number of high-priority school locations and the proportion of courses at those locations being taught by teachers who were not certified in the appropriate field for the courses they teach (out-of-field) and teachers who were certified in the appropriate field for the courses they teach (in-field).⁴ The statewide percentage of courses taught by out-of-field teachers for all schools with at least one school grade component is 8.75%. 10.49% of courses at urban/low-economic schools and 8.01% of courses at rural/low-economic schools are being taught out-of-field. Additionally, Exhibit 6 provides comparative data for other types of school locations (e.g. charter, non-charter schools, etc.). Though this information does not contribute to the identification of critical teacher shortage areas, it is provided for context when reviewing high-priority school locations designated as such pursuant to Rule 6A-20.0131, Florida Administrative Code, and ss. 1012.07 and 1008.34, F.S. For the 2020-21 school year, only schools for which an approved opt-in request was submitted by the school district superintendent or charter school governing board have a letter grade assigned. None of the schools that received a grade in 2020-21 were assigned a “D” or an “F” grade. Because of this, school grades information is excluded from Exhibit 6 this year. The group of schools below consists of all schools that would have traditionally received a school grade. These are schools that had enough data to receive at least one component pursuant to Rule 6A. 1.09981, Florida Administrative Code.

³ Pursuant to FDOE Emergency Order No. 2021-EO-02, only schools for which an approved opt-in request that was submitted by the school district superintendent or charter school governing board received a letter grade for the 2020-21 school year.

⁴ The data for this exhibit utilize several different sources. ‘Location’ data (both for the school grades and the urban/rural designation) come from 2019-20. The primary list of schools comes from 2020-21 MSID. Course and certification data come from 2020-21 survey reporting.

⁵ Pursuant to FDOE Emergency Order No. 2021-EO-02, only schools for which an approved opt-in request was submitted by the school district superintendent or charter school governing board have a letter grade assigned for the 2020-21 school year.
